Kansas City Housing Forecast
A NEW PERSPECTIVE
Not everything we “know” turns out to be true. We begin to take the familiar for granted and fail to notice the changes happening around us. To see things more clearly, we sometimes need to look at things from A New Perspective.

This year’s Kansas City Housing Market Forecast can help you do just that. By combining the latest economic and housing market data with our own unique insights and analysis, the WSU Center for Real Estate provides you with the new perspective you need to prepare and adapt to the changing housing market.

2016 KANSAS HOUSING MARKETS FORECAST  

KANSAS CITY: WELCOME

Special Thanks:

Faith Atteberry | WSU Center for Real Estate
Kipp Cooper | Kansas City Regional Association of REALTORS®
Karen Gehle | Kansas Association of REALTORS®
Jeremy Hill | WSU Center for Economic Development and Business Research
Samuel Radaha | WSU Center for Real Estate
John Ringgold | Real Estate Business Resources
Diane Ruggiero | Kansas City Regional Association of REALTORS®

Participants in the 2015 Kansas City Real Estate Roundtable

The Center for Real Estate receives no state funding. Our activities are supported entirely through gifts from generous supporters throughout the region:

Clark Real Estate Foundation
Meritrust Credit Union
Pulaski Bank Home Lending
Security 1st Title
Walter Morris Endowment for Real Estate
REALTORS® of South Central Kansas

We are also grateful to the REALTOR® boards and multiple listing services that have provided much of the data used to prepare this forecast:

KANSAS CITY REGIONAL ASSOCIATION OF REALTORS® AND PARTICIPATING REALTOR® MLS SYSTEMS ACROSS KANSAS

The W. Frank Barton School of Business at Wichita State has been the driving force behind some of the brightest minds and biggest ideas of the past 100 years. Combining the widest range of undergraduate degrees in the state and virtually unlimited learning opportunities (thanks to Kansas’ largest business community), it’s no surprise that employers continue to show a preference for hiring Barton School graduates.

Wichita State University has one of the oldest real estate programs in the country. Since its inception, the program has strived to maintain close connections with real estate professionals throughout the region.

The Center for Real Estate was established in 2000 to help deepen the connections between the professional real estate community and the academic programs at Wichita State University. Toward this end, the Center engages in a variety of activities that promote and enhance real estate markets and related industries:

- We maintain comprehensive databases of publicly-available information on Kansas real estate markets, and make many of these available on our website at wichita.edu/realestate. If there is data you need, let us know and we’ll see what we can do to help.
- We provide independent, expert analysis of area real estate markets and policy issues related to real estate.
- We conduct high-quality academic research on real estate, and then apply this research to develop practical resources that benefit real estate practitioners, policy makers and the general public. This forecast is just one example of this effort.
- We help students connect with area real estate professionals & organizations. If you have opportunities for current students or want to hire recent graduates, let us know and we’ll help you connect.
While employment growth in Kansas has been slowing over the past year, the opposite has been happening in the Kansas City metropolitan area. The WSU Center for Economic Development and Business Research forecasts that total non-farm employment statewide will rise by 19,958 jobs in 2016, a 1.4 percent increase.

As the Kansas City job market has picked up, the unemployment rate has continued to decline, and is now back down to 5 percent, the level it was before the beginning of the Great Recession.

Although the Federal Reserve did not raise short-term interest rates during its September meeting, the question is when—not if—mortgage rates will begin to rise. Given low inflationary pressures, a modest increase in mortgage rates may actually help the housing market, strengthening the demand for starter homes that are now being bypassed by first-time buyers trying to stretch into more expensive homes given current low rates.
KANSAS CITY
EMPLOYMENT GROWTH HAS ACCELERATED OVER THE PAST YEAR.

Based on revised figures from the Kansas City Regional Association of REALTORS®, area home sales were essentially flat in 2014, rising just 0.6 percent to 32,265 units. The market has been strong so far this year, however, and we expect total home sales to rise by 10.6 percent this year, followed by another 7.3 percent increase in 2016.

The pace of new home construction has picked up this year as well, following a slight decline in 2014. We expect this trend to continue next year, with new single-family building permits rising 11.0 percent to 5,260 units.
KANSAS CITY
HOME SALES
SHOULD RISE
ANOTHER
7.3 PERCENT
IN 2016.

Notes:
A) Total home sales in the Kansas City area as reported by the Heartland Multiple Listing Service
B) U.S. existing home sales as reported by the National Association of REALTORS®; forecast is the September 2015 forecast by the National Association of REALTORS®
C) Single-family building permits issued in the Kansas City metropolitan area as reported by the U.S. Bureau of the Census
D) U.S. single-family housing starts as reported by the U.S. Bureau of the Census; forecast is the September 2015 forecast by the National Association of REALTORS®
The inventory of homes available for sale in the Kansas City area has continued to tighten this year as new listings have failed to keep pace with sales. Ironically, the shortage of listings may be keeping some move-up sellers out of the market, afraid they will sell their existing homes before they can find a new one to buy.

These tight inventories have resulted in fairly strong home price gains. We expect average home values in the Kansas City area to rise by 6.1 percent this year, followed by a 6.3 percent gain in 2016.
TIGHT INVENTORIES OF HOMES AVAILABLE FOR SALE ARE LEADING TO STRONG PRICE GAINS.

Notes:
A) Ratio of active listings to home sales, seasonally adjusted
B) Year-over-year percentage change in the Federal Housing Finance Agency all-transactions housing price index for the Kansas City metropolitan area, as measured using 4th quarter values
HOME SALES ACROSS KANSAS WILL RISE BY 8.6 PERCENT IN 2016.

After remaining essentially flat in 2014, home sales across Kansas have risen sharply over the first half of the year. As a result, we expect total home sales to reach 38,790 units by the end of the year, a 9.8 percent gain. This trend should continue in 2016, with sales rising another 8.6 percent to 42,110 units.

After a lull in 2014, new home construction activity has rebounded nicely this year. We expect total permits will rise another 8.3 percent in 2016 to 5,530 units. This is the highest level since 2007, but still less than half of the peak reached in 2005.

Markets all across the state are reporting tight inventories of homes available for sale, and this has begun to affect home values. Average home price appreciation across the state was 3.8 percent in 2014. We expect this pace to accelerate, with prices rising 4.0 percent in 2015 and another 4.7 percent in 2016.

City of Manhattan; Federal Housing Finance Agency; Heartland Multiple Listing Service; Kansas Association of REALTORS® and participating multiple listing services across Kansas; Lawrence Multiple Listing Service; Manhattan Association of REALTORS®; South Central Kansas Multiple Listing Service; Sunflower Association of REALTORS®; U.S. Bureau of the Census; Wichita Area Builders Association; WSU Center for Real Estate

Notes:
Total home sales, average price and sales volume figures include both existing and new home sales. Building permits reflect single-family residential building permits. Home price appreciation figures are the year-over-year percentage change in the Federal Housing Finance Agency all-transactions house price index, as measured using 4th quarter values. Kansas City figures include transactions from both Kansas and Missouri.
